

## TIRRA Transportation Report

### Transportation Update for 16th Jan 2020

During the 24th Oct 2019 GM, concerns were raised regarding the pavement on the south side of Moore Hill. Cracks have again formed allowing runoff water to penetrate the pavement resulting in deep channels on the downhill southbound lane. Thank you to residents who raised the concern, and also agreed to meet onsite 25th Oct to view the issue.

A site visit was then arranged for 8th Nov 2019 with Ministry of Transportation and Infrastructure along with Emcon Services representatives. It was determined that temporary repairs would be made until more permanent repairs could be made during appropriate weather in the spring/summer of 2020.
